Claims 41-46 have been cancelled.

REASONS FOR ALLOWANCE

With respect to claims 1, 5-12 and 34-40 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the claimed features "a method of establishing a computer-based

communication session involving a user of a computer, said method comprising detecting movement of

the first icon to the position of a second displayed icon within the GUI, wherein one of the first and second

icons represents the desired participant and the other represents the desired communications application

and providing the retrieved participant identifier to the communications application" in conjunction with

other elements of the independent claims are not suggested, anticipated or found to be obvious over the

prior art made of record. With respect to claim 34, the claimed features "a system for computer-based

communications, comprising wherein said notification comprises detecting a combined selection of a first

icon representing the desired communications application and a second icon representing the desired

participant; means for retrieving a participant identifier appropriate to identify the desired participant to the

desired communications application; and means for providing the retrieved participant identifier to the

communications application" in conjunction with other elements of the independent claims are not

suggested, anticipated or found to be obvious over the prior art made of record.

The dependent claims, being definite, further limiting, and fully enabled by the specification are

also allowed.
